DTEX InTERCEPT - DATA LOSS PREVENTION FOR THE VIRTUAL ENTERPRISE
STOP DATA LOSS AND PROTECT VALUABLE IP WITHOUT THE OPERATIONAL OVERHEAD
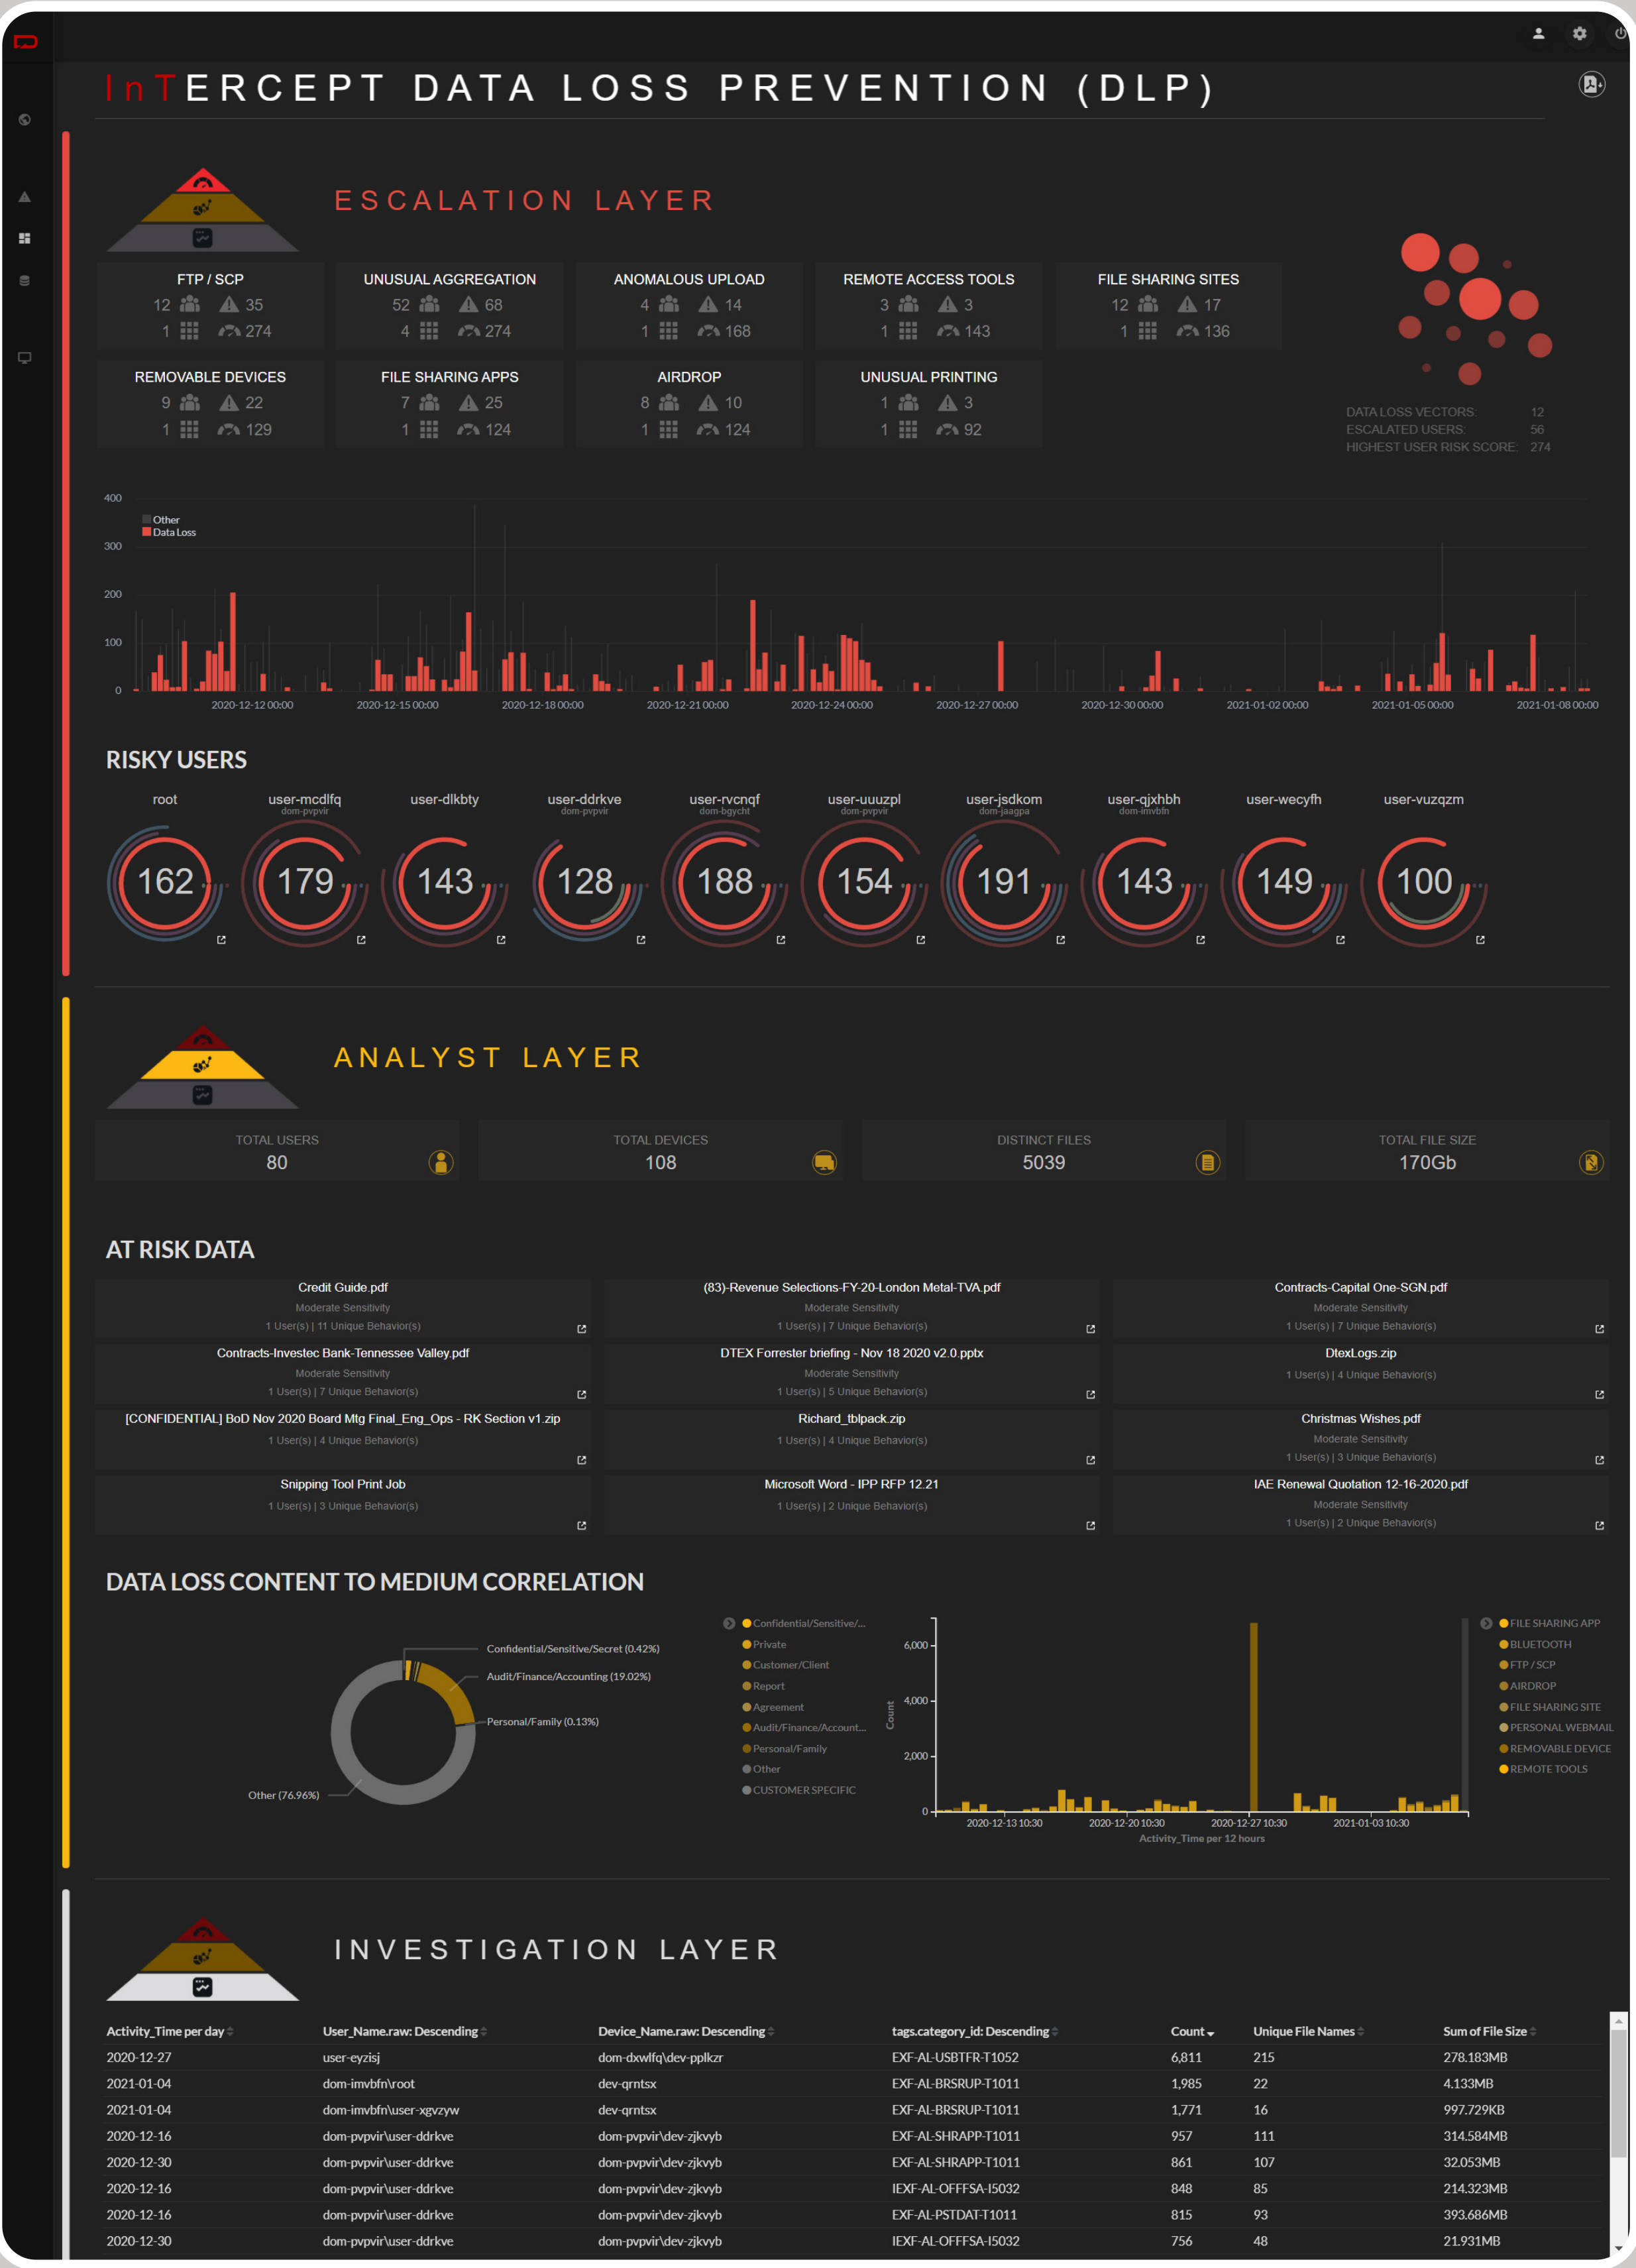

DTEX
WORKFORCE CYBER INTELLIGENCE

60%+ of reported insider threat incidents were the result of careless employees or contractors

23% were caused by malicious insiders

14% of all insider threat incidents involved cybercriminals stealing credentials

FIVE WAYS DTEX InTERCEPT HELPS PROTECT ENTERPRISE DATA

InTERCEPT DLP prevents your most sensitive and valuable data from exfiltration. The powerful dashboard provides the intel you need, all in one place. InTERCEPT DLP includes DTEX Behavior Analytics, which automatically baselines normal behavior and highlights outliers, virtually eliminating the tedious task of manually defining and implementing DLP rules.

1. CONTEXTUAL DATA LOSS PREVENTION

Live dashboards and instant reports streamline evidence gathering and support real-time information sharing, response escalation and directed remediation.

2. STREAMING DATA LOSS ACTIVITY AWARENESS

Integrated data- and user-centric activity scoring algorithms synthesize data loss 'indicators of intent' to alert on sensitive IP and customer data that is at risk of exfiltration.

3. COMPLETE DATA FILE LINEAGE INTELLIGENCE

Track the full history of every file – in use, in motion and at rest – on- and off-network to understand content modifications, usage, renaming and more.
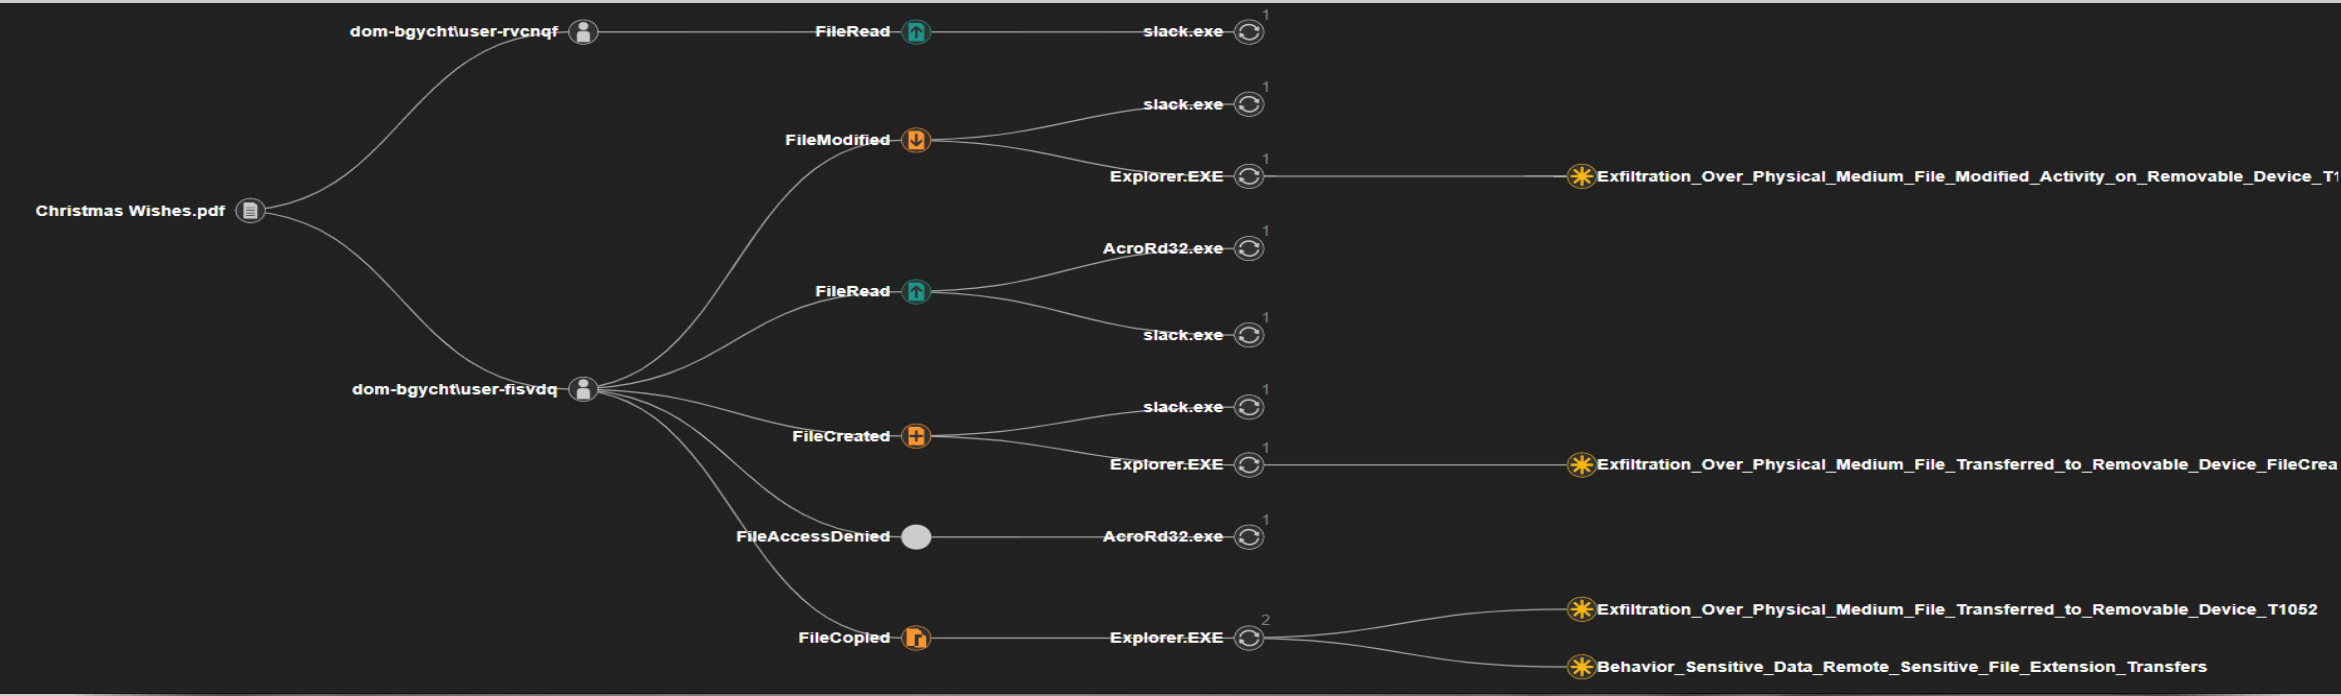

4. INNOVATIVE DATA SENSITIVITY & CLASSIFICATION

Policy templates and patent-pending multi-factor data sensitivity algorithms ingest classification labels and understand content creator behavior to reinforce data classification, and data labeling and monitoring software tools.
5. REGULATORY DATA LOSS COMPLIANCE

Out-of-the-box compliance with HIPAA, CCPA, GDPR, SOX, PCI DSS, ITAR and more regulatory mandates.
